

Energy Efficiency

Programs & Services from Columbia Gas of Massachusetts
for Large Commercial and Industrial Customers

Columbia Gas is committed to providing commercial and industrial customers with technical and financial assistance to reduce natural gas consumption and related energy costs. Our Energy Efficiency Programs offer customers a streamlined, step-by-step process for identifying energy-saving opportunities and installing energy efficiency upgrades that can save you energy and money.

**Columbia Gas of Massachusetts — Working with you
to bring energy savings to your business.**

The Columbia Gas Energy Efficiency Programs for large businesses make energy efficiency easy and improve your bottom line.

> HERE'S HOW:

- Columbia Gas of Massachusetts offers an initial energy evaluation — at no charge to you
- A follow-up energy analysis identifies your energy savings potential and the projected financial benefits to your business
- Columbia Gas pays up to \$100,000 towards qualified improvements
- You save energy and money!

> ENERGY EFFICIENCY PROGRAMS OVERVIEW

All gas customers with combined annual use that exceeds 40,000 therms — including all larger municipal buildings, hospitals, universities, and other campus-like environments — are eligible to participate in the program.

Columbia Gas conducts — at no cost to you — a preliminary walk-through evaluation of your existing or planned facility to identify potential energy-saving opportunities. The evaluation examines existing and/or potential natural gas equipment in your facility, including:

- Space heating equipment and systems
- Heat recovery equipment and systems
- Water heating equipment and systems
- Ventilation equipment and systems
- Gas-fired process and manufacturing equipment
- Building shell improvements
- Temperature and process controls
- Other site-specific technology needs

Based on this evaluation, Columbia Gas then helps you determine the need for a more comprehensive energy analysis to identify specific energy efficiency improvements that qualify for financial incentives. The analysis also outlines the projected financial benefits of these upgrades. A licensed professional engineer

of your choice performs the study; a list of engineers is available upon request. Columbia Gas shares the expense of this analysis with you, providing up to \$7,500 in matching funds.

> DOES COLUMBIA GAS PROVIDE FINANCIAL ASSISTANCE TO HELP ME MAKE THESE IMPROVEMENTS?

Yes. Columbia Gas shares a portion of the cost to design, purchase and install qualified energy efficiency upgrades. Columbia Gas pays 50% of the qualified installed cost, up to a maximum of \$100,000 per master meter.

> HOW DO I LEARN MORE ABOUT THE ENERGY EFFICIENCY PROGRAMS OF COLUMBIA GAS?

Just call 800-232-0120 to speak with a Columbia Gas energy efficiency representative. They will assist you in all your energy efficiency needs, including equipment selection and fuel analysis. Whatever your needs, Columbia Gas is your partner in achieving valuable energy savings for your business.
